SUMMARY

Experienced Front-End Angular Developer with 2 years of hands-on expertise in creating dynamic and user-friendly web applications. Proficient in HTML, CSS, JavaScript, and Angular, with a track record of delivering high-quality code and exceptional user experiences. Skilled in collaborating with cross-functional teams and utilizing modern development tools.

SKILLS

- HTML
- REST API , POSTMAN
- CSS ,SCSS
- MATERIAL , BOOTSTRAP
- JAVASCRIPT
- JIRA , AGILE METHODOLOGIES
- ANGULAR 10+ , TYPESCRIPT
- GIT , GITHUB , FIREBASE

WORK EXPERIENCE

INFOTEL INDIA PVT LTD - DELHI
Angular Developer • 2021 - Present

- Contributed to the front-end development of a web application project for a booking platform.
- Collaborated with designers and backend developers to transform wireframes and mockups into interactive and responsive web pages.
- Developed user interfaces using HTML,CSS, and JavaScript, ensuring cross-browser compatibility and optimal performance
- Implemented RESTful APIs and integrated data from backend services to create dynamic content for web applications.
- Utilized the Angular framework to build modular and maintainable front-end components, enhancing code reusability and scalability
- Applied responsive design using Bootstrap and Material Design, elevating user experience on various devices.
- Managed version control and code collaboration using Git and GitHub, ensuring efficient teamwork and version tracking.

PROJECTS

HOTEL MANAGEMENT WEBSITE
🌐 hotel-management-88cb3.web.app
Open link two time if page not load

- Created distinct user, owner, and admin modules. For the user module, I implemented functionalities such as cart management, hotel booking, and viewing booked accommodations. In the owner module, I developed features including adding hotels, editing hotel details, deleting hotels, and managing hotel bookings. For the admin module, I implemented the capability to access comprehensive data on users, owners, and hotels, allowing for effective oversight and management.
- Integrated RESTful APIs for real-time data retrieval, enabling seamless search and booking of accommodations
- Employed SCSS, Angular Material, Bootstrap, reactive and template forms, auth guards, API services, HTTP, routing.
- Implemented clean code practices for readability and scalability.
- Created an admin-specific route for secure dashboard access.
- Utilized a robust db.json server for backend support.
- Leveraged Toastr for user-friendly notifications, enhancing UX.
- Deployed the Angular codebase using Firebase, effectively utilizing its hosting capabilities to make the application accessible online.
- Managed the db.json code on GitHub, leveraging GitHub Pages to render the db.json data, thus providing a lightweight backend solution.
- Established a connection between the db.json rendering link and the Firebase-hosted Angular application, enabling seamless data retrieval and interaction within the app.
- This personal project, while not intended for production, serves as a testament to my expertise in front-end development and the successful implementation of crucial features within a web application context.

EDUCATION

Bachelor of Science in Computer Science
Sant Gadge Baba Amravati University
